

# We Want To HEAR FROM YOU

The Town of Norman Wells' Community Plan and Zoning By-law are being updated this year. We will be looking to members of the community to share their voices. In the coming weeks and months, we will be reaching out to hear what the community thinks is important to the future of Norman Wells. With your participation, we will be able to create guiding policies supporting community culture and heritage, future growth, recreation and infrastructure, environmental conservation, emergency preparedness and plan implementation that will shape the collective Town direction for years to come.

The first step towards our goal is to get your feedback on the current Community Plan. Please visit the link below to review and comment. This preliminary feedback will help the project team understand the most important aspects of the plan in the eyes of the community.
