

Community Update – June 19

Emerging Wisely Current State: Relaxing Phase 2: Next Steps

Jackfish Lake Park

The opening of Jackfish Lake Park, as part of the Emerging Wisely Plan, was eagerly anticipated by both the Town and the community.

The Town has worked hard to provide access to the park and other areas such as the fitness center with new requirements, procedures and safety guidelines consistent with what is required due to the pandemic emergency. The Town will continue to work towards further access based on the loosening of requirements and our ability to meet Emerging Wisely regulations.

For the vast majority of our community these rules and regulations have been understood and accepted. However, there have been some community members that have disregarded new hours of operations, COVID-19 regulations and other rules and regulations that the Town has in place for liability and the safety of all. This has made the reopening a much more difficult task for the Town to maintain and it jeopardizes use for all.

We are therefore appealing to the community to please take the time to review and observe the rules and regulations in place that allow our facilities and parks to be open during this time. We do not wish to revisit these regulations or have to close facilities and parks due to the non-compliance of some community members.

We are asking for the community's help in keeping one another accountable so that we can all continue to enjoy access to Jackfish Lake Park.
