

## What should I do if I share a household with someone who has Covid-19?

I'm negative but live with someone who is Covid positive

Isolate for 10 days after the date of diagnosis and self monitor for symptoms.

Isolate for 10 more days after the covid positive case is no longer symptomatic.

Isolation is complete after negative exit test result and direction from the Nurse in Charge.

<sup>\*</sup>Exposure to Covid-19 for negative individuals is considered up until symptoms of the positive individual are resolved.

<sup>\*</sup>Isolation for negative cases extends 10 days beyond the last day of exposure.

<sup>\*</sup>The last day of exposure is the last day that the positive case experiences symptoms of Covid-19.
